### About Me

My name is Parsa, a 17-year-old student with a GPA of A+ from grade 9 to 12, and a motivated Web Developer with 3+ years of experience in this field. I have completed the PHP programming probation period in the [Atra](#) company, Java programming class, and achieved an academic IELTS score of 6.5 (L: 7.5, S: 7, W: 6, R: 5.5). As a programmer and student, I have always shown hard work, organization, conscientiousness, and teamwork spirit to result in a high level of proficiency.

### Education

Sept. 2019 – present	Noor high school, Mathematics & Physics. Passed successfully two grades (10, 11) of the secondary school diploma. Studying at a well-equipped and high-tech <a href="#">school</a> . IELTS score: 6.5.
Sept. 2018 – Jun. 2019	Farid middle school.

### Work Interests

Computer Programming (Web development)	<u>Computer Engineering (Software)</u> Computer science
--	--

### Projects

- Designed an [e-commerce bookstore website](#) with the PRADO PHP framework.
- Designed a [Laravel admin panel](#) to simplify the Laravel developers' work in an optimized way.
- Designed a [personal website](#) with the Laravel framework.
- Designed an [e-commerce industrial website](#) with the Laravel framework.
- Experienced a team-work project with a front-end developer and user interface designer, the [website made with React and Laravel for a language fluency instructor](#).

### Employment

Mar 2020 _ Jan 2021	A probation period with the PRADO PHP framework in the <a href="#">Atra</a> company
---------------------	---

### Language

- Persian (native), English (fluent), Arabic (familiar)
- IELTS overall score: 6.5 (L:7.5, S:7, W:6, R:5.5)

### Certificates

- Java Programming language (SE & FX).

I learned Java from scratch to get familiar with the general theories and structure of Computer Programming, and work with complex database queries (JDBC).

- Web development (PHP & HTML & CSS & MySQL).  
In this course, I found a general understanding of Back-end and Front-end development, the database (MySQL), and two Software Frameworks (the PRADO PHP framework and Django Python framework).
- Teaching Java Programming language.  
It is one of my best work experiences to teach Java to children at age 12 on average. I did my best to spark their creativity, and open doors for real-life projects by giving them an assignment.
- Teaching Scratch Programming language.  
Teaching scratch to children led me create lesson plans based on child-led interests and curiosities. In addition, the children practiced the real and basic structures of Computer Programming languages including Algorithm, If, Loop, etc.
